Introduction

TODO

Implementation

1. Referring to the Lab. Simulation reported at the end of OpenFlow course, please implement the simulations reported on slide 45, 46 and 47 of the course module on OpenFlow.

TODO

2. Please verify the functionality of all system components.

TODO

3. Please log all packet exchanges using Wireshark.

TODO

4. Isolate the OpenFlow initialization exchange (get inspiration from the course slides).

TODO

5. Try identifying the ARP requests and replies (get inspired from the course slides).

TODO

6. Isolate and comment the socket creation exchanges using both ICMP and HTTP.

TODO

Conclusion
